

# UVLM UltraLube

Ref No: B40A0008

**... low cost acoustic lubrication**

## UltraLube Acoustic Lubrication

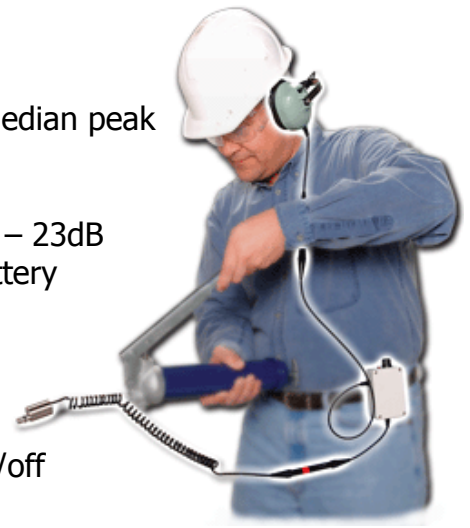

### Features & Benefits

- Audibly alerts the user to the exact amount of grease required
- Reveals existing bearing problems due to under and over lubrication
- Accurate lubrication at proper intervals extends bearing life
- A great complimentary tool to vibration analysts and lubrication personnel
- Integrates easily into existing maintenance programs
- Specially designed connectors can quickly disconnect if cable entanglement occurs during use
- Headphones have a noise rating of 23dB
- Eliminates the necessity of having grease guns calibrated
- Lightweight (under 1kg) and easily portable
- No specialised training required
- Rugged construction

### Technical Specifications

Frequency Range: 20Hz – 20kHz, 4.6kHz median peak  
 Operating Temperature: 0-45°C (32-113°F)  
 Output Volume: adjustable  
 Headset: 8 ohm, attenuating NRR – 23dB  
 Power Supply: 9V Alkaline industrial battery  
 Output Power: 0.7V  
 Weight (Headset): 360 g (12.5 oz)  
 Weight (Electronics Box): 275 g (9.5 oz)  
 Weight (Probe Tip Sensor): 190 g (6.5 oz)  
 Battery Life: Approx. 20-22 hours; on/off indicator light  
 Electronics Box: NEMA 4, ABS plastic, hermetically sealed

Part #	Description
UVLM97-2	UltraLube acoustic lubrication kit Includes electronic meter/box, 23dB headphones, probe tip sensor, carry case, manual
